

SANDEEP RENU PATCHALA

Full Stack Developer

✉ sandeeprenu2199@gmail.com

☎ +91 7013063905

PROFESSIONAL SUMMARY

Versatile Full Stack Software Developer with 4.2 years of hands-on experience specializing in web application development. Skilled in a diverse range of front-end and back-end technologies, demonstrating a resolute commitment to delivering superior, scalable solutions.

WORK EXPERIENCE

Software Development Engineer - 2 (Full Stack Developer)

TANLA PLATFORMS

📌 (July/2021 to present) Bangalore.

- Contributed to the Rich Communication Messaging (RCM) platform that manages a daily traffic volume of 300 million. In this system, clients interact with our APIs, and we, in turn, use META APIs to communicate with WhatsApp. Our primary function is to send campaigns to customers, encompassing various message types such as text, media, and templates.
- Successfully integrated Razorpay and Zaakpay payment gateways into the system, enabling the execution of 60 million payment campaigns.
- Successfully upgraded MongoDB from version 5 to version 7 across the entire system, ensuring a seamless transition with zero downtime or system issues.
- Contributed to the integration of Google's Rich Communication Services (RCS) into the platform, enabling the successful processing of campaigns at a rate of 1000 transactions per second (TPS) per instance.
- Successfully implemented WhatsApp Flows within the RCM platform, elevating the daily traffic to 50 million. This initiative had a significant positive impact without causing disruptions to other components.
- Contributed to platform optimization by introducing Kafka and optimizing existing RabbitMQ routing, increasing the platform's capacity to process 300 million messages per day from 100 million messages per day.
- Supported various clients in implementing their own endpoints and collaborated with META on feature enhancements.
- Contributed to the open-source WhatsApp Flows project initiated by META engineers, identifying and addressing bugs within the project.
- Designed and implemented the user interface for an arithmetic operations chatbot on the WhatsApp channel, along with the development of REST APIs to enable its functionality.
- Done the Telesign POC which helps to avoid the onboarding of spam MobileNumbers.
- Designed and developed a comprehensive Help Center web page aimed at providing onboarding clients with detailed information about the product, facilitating their understanding and usage of the product.
- Collaborated closely with senior and staff engineers to successfully execute the migration process from ClickHouse database to MongoDB. Additionally, played a key role in the conversion of ClickHouse queries to MongoDB queries, ensuring a smooth transition and maintaining data integrity throughout the migration.
- Leveraged the capabilities of Kore.AI and Twixor platforms to create tailored chatbot solutions for clients, encompassing development, deployment, and customization. Additionally, contributed in designing and implemented a custom application that triggers responses when the bot remains idle for a duration of 10 minutes.

WORK EXPERIENCE

Software Engineer

Persistent Systems (Dec/2020 to June/2021)

📍 Pune

- Engaged in the House Price Prediction Project, actively contributing to the development and implementation of algorithms and models to accurately predict housing prices.
- Involved in Data Preprocessing Stage and Model Building.
- Undergone training on Nodejs and Angular and contributed to the Organisation Portal enhancement.

Projects

PERSON DETECTION:

- Applied Convolutional Neural Networks (CNN) to detect and identify individuals within images, contributing to the development of an advanced person detection system.
- I have trained the neural network using different kinds of images by labelling the person on every image.
- Employed the pretrained RESNET-50 model, achieving impressive accuracy levels for person detection and recognition tasks.

EDUCATION

Bachelour of Technology(Computer Science and Engineering)

NIT DURGAPUR (July/2016 to July/2020) CGPA - 7.60

📅 Jul / 2016-Jul / 2020 📍 Durgapur

Intermediate

Narayana IIT Junior College 97.8 %

📅 2014-2016 📍 Vijayawada

SSC (10 th Grade)

Montessori English Medium High School CGPA - 9.7

📅 2013-2014 📍 Gudivada

ACHIEVEMENTS

🏆 Award

- Recognized as the recipient of the Best Performer Award , highlighting outstanding contributions to the project's success.
- I published a blog on Medium about WhatsApp system design, a 6-minute read, which received widespread appreciation. Over 2,000 people have read it, and I'm honored that Google lists my blog as the top suggestion.
<https://medium.com/@sandeeprenu1430/whatsapp-system-design-ffc0158d544a>
- Achieved the STAR performer award in the organisation
